

PRODUCTION LINE CAMEX – 50 BOXES / MIN

« *The production line CAMEX, for a high production of soft cheese boxes* »

- ❑ The CAMEX is dedicated to the production of **crimped boxes in paperboard** for the packaging of soft cheeses such as Camembert, Brie or Coulommiers.
- ❑ The machine works on two parallel lines, one for the lids and the other one for the bottoms. Lids and bottoms are assembled at the end of the process, to deliver empty and closed boxes.
- ❑ Lids and bottoms are made from a crimped belt, on which a disc is assembled by gluing.
- ❑ Crimped boxes can be of different shapes (round, oval...).

- **Productivity** : from 40 to 60 boxes / min
- **Weight** : 4,7 tons
- **Power consumption** : - electricity : 15 kWh
- compressed air : 2 m³h
- **Required ground surface** : 10 m²
- **Dimensions of boxes** : - any form inside a circle Ø 180 mm
- height from 20 to 60 mm
